

SAI DURGA MOUNISH MADIREDDY

Senior Full Stack Developer | Technical Lead | Angular 18/19/20 | Spring Boot | Java 17+ | Python

Hyderabad, India | +91-8309928216 | saidurgamounishmadireddy@gmail.com | LinkedIn: Sai Durga Mounish Madireddy

PROFESSIONAL SUMMARY

Senior Full Stack Developer and Technical Lead with 5.5+ years of experience specializing in enterprise application modernization, Angular migrations, Java 17+, Spring Boot, JavaScript/TypeScript, RESTful APIs, and relational databases. Strong hands-on experience upgrading legacy Angular and JSF applications to modern Angular architectures while improving maintainability, performance, and user experience. In-depth knowledge of Angular application architecture, reusable components, RxJS, Signals, lazy loading, performance optimization, Java/Spring Boot backend development, microservices, API integration, and SQL optimization. Experienced in leading Agile delivery, mentoring developers, modernizing full-stack workflows, and delivering scalable, high-performance enterprise applications.

TECHNICAL SKILLS

Frontend: Angular 18/19/20, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Bootstrap, Angular Material

Backend: Java 17+, Spring Boot, Microservices, RESTful APIs, API Design

State Management: RxJS, Angular Signals

Databases: PostgreSQL, MySQL, SQL Server, SQL Query Optimization, Indexing, Caching

Real-Time & Analytics: WebSocket, Highcharts, Dashboards, BI Reporting, KPI Widgets, Drilldowns

DevOps & Delivery: Git, Jenkins, CI/CD, Agile/Scrum

Leadership: Technical Team Leadership, Sprint Planning, Reviews, Retrospectives, Mentoring, Coding Standards, Performance Tuning

PROFESSIONAL EXPERIENCE

IntouchCX | Hyderabad, India

Senior Full Stack Developer | Oct 2025 - Present

- Migrated enterprise applications from Angular 15 to Angular 20 using an optimized upgrade approach, modernizing deprecated patterns, improving application architecture, and applying performance-tuning techniques that improved overall application performance by approximately 20-30%.
- Enhance frontend and backend code using modern Angular, Java, and Spring capabilities to improve scalability, reliability, and application performance.
- Refactor end-to-end workflows to improve UI responsiveness, backend efficiency, and integration between frontend modules and REST-based services.
- Contribute to reusable application patterns and cleaner full-stack architecture while preserving existing business functionality during migration.

Nekkanti Systems | Hyderabad, India

Senior Frontend Developer | Full Stack Java Developer | Frontend Team Lead | Nov 2021 - Sep 2025

- Designed scalable Angular applications using reusable components, directives, lazy loading, RxJS, and Signals.
- Built Spring Boot microservices and REST APIs integrated with PostgreSQL and SQL Server for enterprise reporting and financial workflows.
- Developed interactive dashboards, KPI widgets, charts, grids, filters, and drilldowns supporting ALACARTE and Hierarchical reporting patterns.
- Improved SQL query performance through indexing strategies and caching, reducing response times by 30%.
- Upgraded and migrated a large-scale Angular application from Angular 11 to Angular 19, replacing deprecated implementations with current Angular standards, modernizing module-level functionality and reusable application patterns, and optimizing rendering, loading, and application workflows to improve overall performance by approximately 30%.
- Led frontend sprint planning, reviews, and retrospectives; mentored junior developers on Angular best practices, coding standards, and performance tuning.
- Collaborated across frontend and backend teams on API contracts, versioning, data integration, and end-to-end feature delivery.

FalconX Technologies | Hyderabad, India

Junior Engineer - Frontend & Backend Development | Nov 2020 - Nov 2021

- Contributed to Angular and Spring Boot applications with REST API and SQL database integration.
- Supported dashboard modules and data visualization tools used for finance and operations reporting.
- Worked across frontend, backend, and database layers to troubleshoot defects and deliver application enhancements.

PROJECTS

E-Commerce Merchant App | Angular 19, Signals, WebSocket, Spring Boot, PostgreSQL

- Built a modular Angular 19 interface with responsive design, dark/light mode, and real-time updates using WebSocket.
- Used Angular Signals for reactive state management, reducing change-detection overhead by 40%.
- Implemented financial dashboards, GST filing, transaction analytics, Spring Boot API integration, and SQL optimization for high-volume financial data.

Cash & Collections Management Tool | Angular, Highcharts, Spring Boot, SQL Server

- Developed KPI-driven dashboards for invoices, payments, overdue amounts, and reconciliation workflows.
- Improved responsiveness through lazy-loaded Angular modules and RxJS-based data refresh; collaborated on API contracts and invoice reconciliation logic.

Business Intelligence Reports Platform | Angular, Spring Boot, REST APIs, PostgreSQL

- Built a self-service BI platform with custom reports, filters, export options, reusable charts, grids, and filter components.
- Supported ALACARTE and Hierarchical dashboard patterns for flexible analytics and drilldown reporting.

GL Byte - Finance Automation Platform | Angular, RxJS, Spring Boot, PostgreSQL, SQL Server

- Delivered real-time financial workflow dashboards using RxJS observables, KPI widgets, grids, analytics charts, and form wizards.
- Collaborated with backend teams on API versioning, contracts, and integration across finance workflows.

EDUCATION

Bachelor of Technology | Institute of Aeronautical Engineering, India | 2016 - 2020

LANGUAGES

English: Fluent | German: A1 Certified, A2 Ongoing
